CAREER OBJECTIVE

In the short term, the first thing I need to do is carry out the tasks assigned to the best advantage. And when I become the best man for this kind of job, I want to take on bigger, great-difficulty challenges so I can assess all my abilities in the ensuing years. I hope I can apply my general knowledge in software design, development, and testing to serve your organization.

EDUCATION

International University

Sep 2020 - Present

Bachelor of Computer Science

- **GPA:** 3.11/ 4.0.
- **Relevant Courses:** C Programming, OOP in Java, Computer Architecture, Principle of Database Management.

SKILLS
